

Home Ready Meals

This menu is 100% gluten free, dairy free & oil free and full of nutrient dense foods. We focus on obtaining as much of the produce locally and chemically free with a focus on reducing food waste and our general impact on the environment. Small containers can be composted and lids recycled into your recycling bin. Even better - you can supply us with your own reusable containers for us to put your meals into. It's all about convenience that doesn't cost your health or the Earth.

All meals come freshly made. Some can be frozen and some just need to be eaten fresh!
